We, Digital Pulz (Pvt) Ltd. are glad to announce that "Tele Pulz" has been added to complement the features of the Mini Pulz product. "Tele Pulz" is an easy to use and easy to adapt mobile application that supports video consultations. With the spread of the epidemic and the necessity to restrict social interaction, this mobile application will help you to continue your clinic's operations adhering to health guidelines and protecting your customers.

Total video consultation process is under your control and safeguard the privacy of your earnings. You will not be charged on your income.

HOW TO USE:

1   A Telemedicine appointment can be made by the receptionist via Mini Pulz platform or directly by the patient through a web portal.

2   After making the payment directly to your account, the patient will receive a code and a link generated by Mini Pulz to download the Telepulz app via SMS.

3   After downloading the app, the client can use the code received via SMS to connect to the specific video session. (Note: Client can connect to the call only after the doctor join the session, until then the client will wait in a lobby area)

4   The doctor will be joining from the doctor's dashboard with the link available on the Telepulz web application via a new browser window.

5   At the end of the session, the doctor can end the call for both ends.

WE OFFER THE BEST TECHNOLOGY APPLICATIONS TO MAKE YOUR WORK CONVENIENT, EFFICIENT AND PRODUCTIVE..!

"TRANSFORM YOUR PRIVATE PRACTICE TO FACE THE CHALLENGES POSED BY NEW NORM"

Mini Pulz

Digital Pulz

We appreciate the service you provide to our society by serving patients in different age ranges and from different walks of life. We know your stress in dealing with patient administration, record keeping, patient history tracking, and management. On top of that, this pandemic has brought new challenges such as movement restrictions where they are unable to reach you.

We, Digital Pulz (Pvt) Ltd., innovated a software solution, 'Mini Pulz,' to safeguard your private practice from above challenges and bring peace to you. This software is a result of careful study to cover all aspects of clinical flows in your clinic. It has simple interfaces and its process is easy to understand. It maintains privacy of patients' records and securely maintains their records complying with latest standards.

Mini Pulz is made up of four modules that work together to complete the clinic's workflow in an efficient and productive manner.

Front Desk / Reception	• Registration of patients • Making appointments/online appointments • Issue tickets to maintain queue • Assignment of patients to diagnostics rooms • Attaching lab reports and X-rays to patient's profile
OPD (Physician's Interface)	• Access to patient history and records • Prescribing medicines, Lab and Radiology Requests • Record Examinations, Vaccinations, and Dressing room operations • Online video consultations • Adding consultations and medications to bill
Billing	• Billing for consultations and medications • Allowing for refunds, credit payments, and advance payments
Inventory	• Convenient Inventory management and pricing • Integration of pharmacist and cashier in prescription issuance • Stock updates in real time • Reminders on date of expire

BENEFITS RECEIVED

• Converting your clinic to an e-Clinic by securely keeping your patients' Electronic Medical Records (EMR) up to date and available from any device, at any time.
• Ability to attach important lab reports, images of wounds, X-ray/CT Scan/MRI images or other reports to patient's record
• Automated SMS system for patient's e-reports.
• Automated report generation for all operations, i.e. clinical administration, financial, inventory management.
• Automated inventory management reminder system.
• No paperwork and patient records with a convenient archiving method.

POST PURCHASE SERVICES OFFERED;

• We constantly innovate to add novel features to these modules and offer those features free of charge to existing Clients.
